SUMMARY

Software Engineer & Data Analyst experienced in developing digital platforms, automating KPI systems, and supporting digital transformation within PMO and government environments. Skilled in building smart solutions, analysing data, and creating interactive dashboards using Power BI, Excel, Java, Python, Django, and modern web technologies to enhance performance measurement, workflow optimization, and data driven decision making.

EXPERIENCE

Software Engineer SAUDI AIRLINES, Jeddah Jan 2025 — Aug 2025

Developed an automated KPI system using Python, Java, Django, and MySQL, supported by interactive Excel dashboards for project performance tracking. Enhanced reporting quality through collaboration with PMO and department managers while validating and governing KPIs for accuracy and alignment. Delivered concise, high-quality performance reports that strengthened strategic decision-making.

Software Engineer Digital Transformation Technician – Hail Region Municipality Feb 2026 — Aug 2026

Automated the Digital Transformation Policies & Procedures guidebook and optimized municipal digital platforms and workflows. Built a KPI tracking platform aligned with transformation standards, implemented measurement criteria, and developed the agency's official digital platform interface.

Technical Technician Ministry of Environment, Water and Agriculture, Hail May 2023 — Apr 2026

Designed an AI model to improve digital engagement and user experience while preparing organizational templates and official forms. Communicated effectively with diverse community groups and served as an official spokesperson during events, producing visual media and promotional video content. Prepared and organized annual reports professionally, ensuring clear, high-quality documentation.
