FALAK SAAD AL-DAHAM

Software Engineering Student · University of Hail

+966 55 565 1720 | Falak01sa@gmail.com | Hail, Saudi Arabia | Saudi National

PROFESSIONAL SUMMARY

Motivated Software Engineering student at the University of Hail with skills in programming, A. Experienced in hackathons and workshops, with a proven ability to solve problems, collaborate effectively, and build practical solutions. Seeking opportunities to contribute and innovate in the tech industry.

EDUCATION

Bachelor of Science in Software Engineering *2021 – Present*

University of Hail — College of Computer Science & Engineering · Hail, Saudi Arabia

TECHNICAL SKILLS

- **Data Science:** Big Data fundamentals, data analysis concepts, data-driven decision making
- **Software Engineering:** Software Development Lifecycle (SDLC), object-oriented programming (OOP), system design principles

CORE COMPETENCIES

Problem Solving: Structured analytical approach to complex challenges; experienced in hackathon-style rapid ideation

Team Leadership: Coordinating cross-functional teams, assigning roles, and driving toward shared goals under pressure

Creative & Innovative Thinking: Design thinking methodology; consistently generating novel, user-centered solutions

Communication: Clear and confident communicator in Arabic (native); skilled at presenting ideas to diverse audiences

Adaptability & Fast Learning: Rapidly acquires new technical skills; comfortable pivoting strategy in dynamic environments

Attention to Detail: High accuracy in technical documentation, code review, and project planning

HACKATHONS & COMPETITIONS

Aja Hackathon *2025*

National Technology Competition — Saudi Arabia

- Developed an innovative tech solution as part of a collaborative team under intensive time constraints.
- Applied software engineering practices to prototype, and present a working concept to an evaluation panel.
- Strengthened rapid prototyping skills and cross-team communication in a high-stakes environment.

Inspatia Hackathon ***2025***

National Technology Competition — Saudi Arabia

- Contributed to product development from concept ideation to live demonstration.
- Collaborated with multidisciplinary teammates to deliver a competitive, well-structured solution.
- Sharpened skills in pitching ideas clearly and defending technical decisions to judges.

Municipal Innovation Hackathon ***2025***

Smart Cities Initiative — Saudi Arabia

- Designed smart city solutions targeting real municipal challenges in urban planning and public services.
- Applied civic tech thinking to create community-oriented, scalable product concepts.
- Demonstrated ability to align technical solutions with governmental and social impact goals.

Smart Mobility Hackathon ***2025***

Transportation Innovation Program — Saudi Arabia

- Developed AI-driven and data-informed concepts to address transportation and smart mobility challenges.
- Led the technical architecture discussion within the team, ensuring feasibility and innovation balance.

CERTIFICATES OF ATTENDANCE

Innovative Technologies Program 7 — University of Hail, College of Computer Science & Engineering

- First Step with Python Workshop — *University of Hail* *Feb 19, 2025*
- The Relationship of Programming to Artificial Intelligence Workshop — *University of Hail* Feb 19, 2025
- AI Robots Workshop — *University of Hail* Feb 18, 2025
- Big Data Science and Its Importance Workshop — *University of Hail* Feb 20, 2025
- Introduction to Cyber Attacks Workshop — *University of Hail* Feb 20, 2025
- Social Engineering and Its Impact on Cybersecurity Workshop — *University of Hail* Feb 18, 2025

VOLUNTEER EXPERIENCE

University Volunteer ***2022 – Present***

University of Hail · Hail, Saudi Arabia

- Participated actively in organizing and supporting multiple academic, cultural, and technical university events.
- Contributed to creating an inclusive, engaging campus environment and building community among peers.
